

Blitz Fuel Containers are made of tough, high-density polyethylene, are rust-proof and dent-proof and are designed to meet new regulations mandated by the EPA*. These products are available now with the most user-friendly spout on the market:

ENVIRO-FLO

Advanced spout design combined with child-resistant features and enhanced emission reducing technology delivers a user-friendly and environmentally-safe fuel storage solution.

Assembly:
Twist nozzle onto can: tighten until tab engages.

Unlock:
Lock trigger in pour position: Insert nozzle into tank.

Depress lever to pour; release lever to stop flow.

MS301
ENVIRO-FLO
