

# RIZE<sub>2</sub>

THE ULTIMATE SEXUAL  
PERFORMANCE ENHANCER  
FOR MEN

**Rize 2** is an all-natural herbal supplement for male sexual performance enhancement. It has a unique combination of ingredients that includes **Sarsparilla extract**, **Arginine**, **Maca Root**, **Rhodiola Rosea Root** and **Dioscorea Villosa Root**.

**Maca** - This energizing plant is also referred to as Peruvian ginseng. Maca has been used for centuries in the Andes to enhance fertility in humans and animals. Soon after the Spanish conquest in South America, the Spanish found that their livestock was reproducing poorly in the highlands. The local Indians recommended feeding the animals maca; so remarkable were the results that Spanish chroniclers gave in-depth reports. Even colonial records of some 200 years ago indicate that payment of (roughly) nine tons of maca was demanded from one Andean area alone for this purpose.

In Peruvian herbal medicine today, maca is reported to be used as for other reproductive and sexual disorders.

Maca has been growing in world popularity over the last several years due to several U.S. products touting its energizing, fertility enhancement, hormonal balancing, aphrodisiac, and, especially, enhanced sexual performance properties. Other herbal medicine uses in the U.S. and abroad include increasing energy, stamina, and endurance in athletes, promoting mental clarity, treating male impotence, and helping with menstrual irregularities, female hormonal imbalances, menopause, and chronic fatigue syndrome. Maca is an annual plant which produces a radish-like root. The root of maca is typically dried and stored, and will easily keep for seven years.

**Sarsparilla** root has been used for centuries by the indigenous peoples of Central and South America for sexual impotence, rheumatism, skin ailments, and as a general tonic for physical weakness. Sarsparilla has also been used to cleanse the blood, relieve pain, detoxify organs and aid absorption.

**Dioscorea Villosa**, also known as wild yam, provides the steroid building blocks for developing human sex hormones and can be used for developing muscle mass and strength. It is also used as an anti-fatigue remedy.

**Rhodiola** is native to Asia, parts of Europe and the Arctic. Found in mountainous regions the root is used in many "traditional" medicines and is commonly called "golden root". It is known to help relieve stress while increasing energy. It contains a powerful combination of Rosavin, Rosarin, Rosin, Rhodiololide, and Isoflavones (etc.). It is commonly used to enhance performance and endurance, increase sexual libido, and as a natural alternative to help overcome erectile dysfunction.

**The total is more than the sum of its parts. Rize2's ingredients were extensively researched by its R&D team prior to producing. It is the proprietary combination of these ingredients that produce outstanding results so that you can **RIZE 2 THE OCCASION!****
